Art Unit: 1743

#### **DETAILED ACTION**

## Election/Restrictions

Applicant's election without traverse of group I, claims 1 – 58 and 85 – 113 in the response filed 1/20/2004 is acknowledged. Claims 59 – 84 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

#### **Drawings**

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the robot recited in part (c) of claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 102

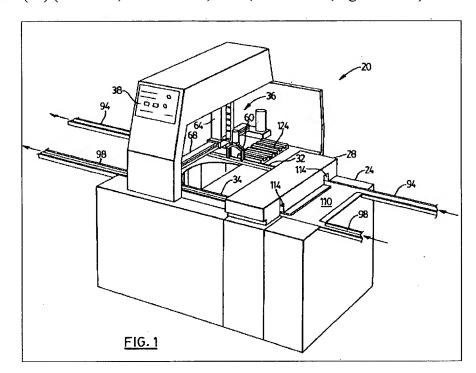

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

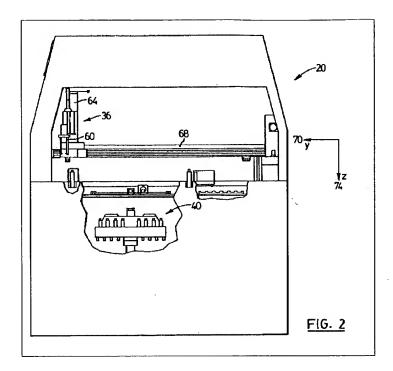

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 1. Claims 1, 4 20, 24 40, 48, 56, 58 and 85 113 are rejected under 35 U.S.C. 102(b) as being anticipated by Quinlan et al. (U.S. Pat. No. 5,769,775 A). Quinlan et al. teach an

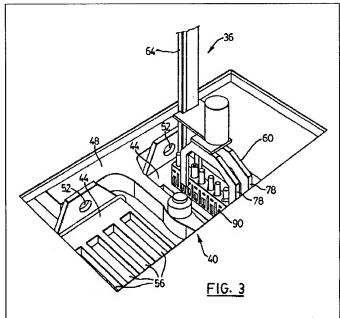

Art Unit: 1743

automated centrifuge apparatus comprising: a rotor (40) comprising a plurality of sample receiving regions (56); and a transport mechanism (24, 94, 98) configured to move one or more sample processing components proximal to or within the plurality of sample receiving regions; and at least one robot (36) capable of inserting at least two sample vessels (44) into the sample receiving regions (56) (see col. 3, lines 15 - 67; col. 4, lines 1 - 65; figures 1 - 3).

Art Unit: 1743

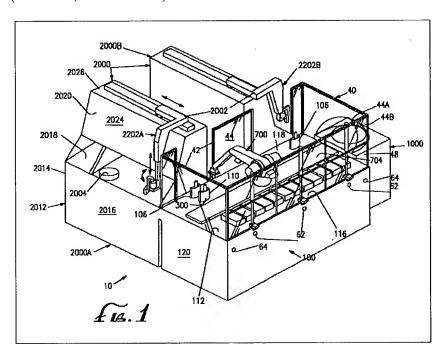

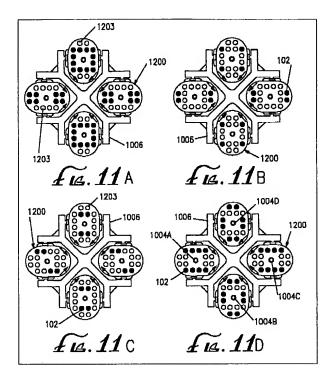

2. Claims 1 – 20, 24 – 44, 48 and 85 – 113 are rejected under 35 U.S.C. 102(e) as being anticipated by Pang et al. (U.S. Pat. No. 6,060,022 A). Pang et al. teach an automated centrifuge apparatus comprising: a centrifuge rotor (1000) comprising a plurality of sample receiving

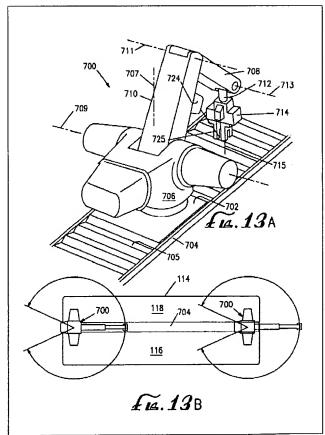

Art Unit: 1743

regions (1200); and a transport mechanism (700) configured to move one or more sample processing components proximal to or within the plurality of sample receiving regions; and at least one robot (2002) capable of inserting at least two sample vessels, such as test tubes, into the sample receiving regions (1200) (see col. 1, line 1 - col. 14, line 64; figures 1 - 21). The apparatus includes an optical position sensor and an indicia scanner (see col. 8, lines 1 - 32). The apparatus comprises two analyzers for selectively performing at least two different analyses on a specimen (see col. 6, lines 51 - 67).

Art Unit: 1743

Art Unit: 1743

# Allowable Subject Matter

Claims 21 - 23, 45 - 47, 49 - 55 and 57 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art neither teach or fairly suggest the further incorporation of the claim limitations recited by claims 21 - 23, 45 - 47, 49 - 55 and 57 within the apparatus of either Quinlan et al. or Pang et al.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hubert et al. teach an automated centrifuge loading device. Riggs teach an automated blood sample processing system comprising a centrifuge system. Auchinleck teaches an automatically-loaded centrifuge system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines, Ph.D. whose telephone number is (571) 272-1263. The examiner can normally be reached on Monday - Friday (11:30 AM - 8 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
